

EDF successfully launched the “Advanced Euroderm Excellence” Program in 2021 directly prior to our Annual Meeting with a group of 20-25 carefully selected participants from the original Euroderm Excellence course who are expected to be the future opinion leaders in dermatology and venereology. It is the aim of the program to provide an outstanding teaching program for European dermatology residents covering areas such as managing a clinical department, risk management, role of global dermatology, compliance regulations etc. and to strengthen skills in these areas.

It offers selected residents an opportunity to share time and experience with their peers from all over Europe, and to have a chance to interact with a panel of leading experts in dermatology and venereology. The ultimate objective is to educate future experts and leaders in the field of dermatology and venereology.

Program Advanced Euroderm Excellence Course 2025

Thursday, January 23:
